PPD

Updated: 31 Mar 2016

Use PPD to calculate the previous payment date for loan with regularly scheduled periodic payments.

Syntax

```
Public Shared Function PPD(
    ByVal SettDate As Date,
    ByVal FirstPayDate As Date,
    ByVal pmtpyr As Integer,
    ByVal NumPmts As Integer,)
```

Arguments

SettDate

> the date from which you want to calculate the previous payment date. The previous payment date is the maximum payment date less than or equal to *SettDate*. *SettDate* is an expression that returns a **Date**, or of a type that can be implicitly converted to **Date**.

FirstPayDate

> the date that the first payment is due. *FirstPayDate* is an expression that returns a **Date**, or of a type that can be implicitly converted to **Date**.

pmtpyr

> the number of loan payments made in a year. *pmtpyr* is an expression that returns a **Integer**, or of a type that can be implicitly converted to **Integer**.

NumPmts

> the total number of payments to be recorded over the life of the loan. *NumPmts* is an expression that returns an **Integer**, or of a type that can be implicitly converted to **Integer**.

Return Type

Date

Remarks

- If *SettDate* < *FirstPayDate*, NULL is returned
- *Pmtpyr* must be between 1 and 365
- If *Pmtpyr* = 13, then payments are calculated every 28 days from *FirstPayDate.*
- If *Pmtpyr* = 26, then payments are calculated every 14 days from *FirstPayDate.*
- If *Pmtpyr* = 52, then payments are calculated every 7 days from *FirstPayDate.*
- If *Pmtpyr* = 1, then payments are calculated every 1 year from *FirstPayDate.*
- If *Pmtpyr* = 2, then payments are calculated every 6 months from *FirstPayDate.*
- If *Pmtpyr* = 3, then payments are calculated every 4 months from *FirstPayDate.*
- If *Pmtpyr* = 4, then payments are calculated every 3 months from *FirstPayDate.*

- If *Pmtpyr* = 6, then payments are calculated every 2 months from *FirstPayDate.*
- If *Pmtpyr* = 12, then payments are calculated every 1 month from *FirstPayDate.*
- If *Pmtpyr* = 24, then payments are calculated every semi-monthly from *FirstPayDate.* If the *FirstPayDate* is the 15th of the month, payments are on the 15th and the last day of the month. If the *FirstPayDate* is the last day of the month, then payment dates are on the last day of the month and the first day of the month.
- If *NumPmts* IS NOT NULL, then PPD will not return a date greater than the maturity date of the loan.
